

YFTD28 等电位联结端子箱

Equipotential connection terminal box

型号 Type: YFTD28-10

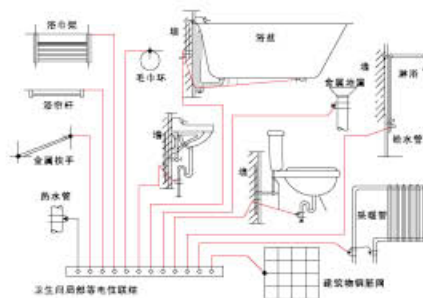

YFTD28-10 型等电位联结端子箱，可联结水管、暖气管、下水管道等各类楼层连通的立管和建筑物内钢筋，有效预防从不同方向传导过来的电击危险，为现代化住宅最基本的等电位联结做法。

YFTD28-10 type equipotential connection terminal box can be connected to connection water tube, heating pipe, water drain etc such vertical pipe of all kinds of floors, as well as to the inner reinforcing steel of buildings, which can effectively prevent electric shock that transmitted from different directions. It is the basic equipotential connection methods for modern housing.

型号 Type: YFTD28-20

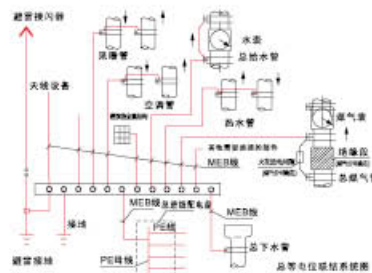

YFTD28-20 型等电位联结端子箱，接线端子为 3-12 个，适用于高级宾馆、饭店、高级住宅的卫生间，医院手术室做局部等电位联结，它比 10 型联结范围更广，涵盖了几乎所有的外露可导电部分，真正达到了局部范围的“等电位”，从而避免了因各种原因而引入的电位对人体的意外伤害。

YFTD28-20 type equipotential connection terminal box has 3-12 connection terminals. It is applied to superior hotel, restaurant and the toilet of high-grade housing, and for partial equipotential connection to hospital operating room. It is has wider connection range than 10 type, almost covering all exposed and conductive parts, and really up to "equipotential" for partial range, thereby to avoid accidental injury to human body by the drawing in potential caused by various reasons.

型号 Type: YFTD28-30

YFTD28-30 型等电位联结端子箱为铁壳，接线端子为 M10 四个，M6 六个，适用于整栋建筑做总等电位联结。

YFTD28-30 type equipotential connection terminal box is steel cased and has four M10 and six M6 connection terminals. It is applied to total equipotential connection for the whole building.
